Aladyr International Seminar on Reuse and Water Desalination PERU

The Latin American Association for Water Desalination and Reuse (ALADYR) will hold the Aladyr International Seminar on Reuse and Water Desalination on April 15 and 16, 2017 at The Radisson Hotel, located in the heart of Miraflores in the city of Lima, Peru.

ALADYR aims to promote and develop technologies and projects aimed at the desalination and treatment of water for reuse and consumption under the standards of sustainability and environmental respect. Aladyr has the formal support of the Spanish Desalination and Reuse Association (AEDYR), the International Desalination Association (IDA) and the Caribbean Desalination Association (CARIBDA). Associations with successful and efficient trajectory in terms of water treatment.

This seminar will focus on the conditioning and reuse of water for the industrial, mining and municipal sector through membrane technology, as well as seawater desalination. Each edition of the Aladyr Seminar allows us to bring together a diversity of speakers, corporations and researchers whose experiences in the industry allow us to continue growing and adding accomplishments in pursuit of our main goal.

Being the objective to group the most important representatives in the matter, we invite you to participate as an exhibitor or observer in our event, offering you an opportunity to debate and transmit knowledge to others in Spanish.

Those who exhibit their work can position and promote their company at an international level by publicizing their products or services, generating technical contact networks and establishing new commercial links with a focused and interested public in our industry.

For registering and acquiring more information about the program and sponsorships you can access our website <http://aladyr.net/eventos/>

For more information, please contact us at info@aladyr.net or dircom@aladyr.net or visit our website: <http://aladyr.net/seminario-peru/>
