STATISTICS FOR 2021 EDITION

3078	75	9
Children	Schools	Latin American countries

Thanks to the successful previous editions of the ALADYR Water Olympics, in 2022 we will continue to raise awareness among children and youth about the importance of appreciating water and effluents through the integration of desalination, reuse and treatment technologies. The goal is to have an increasing number of citizens committed to the efficient and sustainable management of water resources.

Join us in our 2022 activities:

On our 2022 Water Olympics, we will work in four (04) online sessions spread over 02 weeks. We will start on May 10, 2022 and finish on May 18, 2022. Participants' age range will be between 10 and 14 years old.

Topics:

-  Emerging pollutants - MAY 10, 2022
-  Water reuse - MAY 11, 2022
-  Water desalination - MAY 17, 2022
-  Sanitation. How water gets to our homes - 18 May 2022

Trivia section:

-  At the end of the day's session, we will hold a trivia section to assess learning about the topic. Each meeting will have a first, second and third place for the children who answered the trivia correctly and the fastest.

Awards:

-  The students placing first, second and third of each session will receive a recognition certificate and will be featured in our digital magazine "AGUAS LATINOAMÉRICA" as the winners of the "ALADYR WATER OLYMPICS - 2022 INTERNACIONAL EDITION". They will also have a featured spot in our networks and website.
-  The 1st place winner of each session will also be awarded with an Amazon Gift Card worth \$150. We will give away a total of 04 Gift Cards.

CONSIDERATIONS:

-  All sessions will be VIRTUAL and will be held at the most convenient time to gather the majority of registered schools.
-  The educational institution is responsible for the notification and participation compliance of parents or guardians of the children.
-  The total duration of each session will be one (1) hour and thirty (30) minutes (1 hour for the topic presentation + 30 minutes for questions, trivia and awards).
-  As part of the activity, we will share the session material with the teachers at the end of the Olympics.
-  The access for students to join the activity will be sent a week before to the teachers for them to share it with the participants with the details that will simplify their integration in the activity.
-  The educational institution may enroll ALL the students desired, as long as their ages fall within the participation age range (between 10 and 14 years old), or they may select groups according to the educational needs of the school calendar.

Registration:

You can submit the name of your children's school(s) and location and we will contact them to include them as participants in the 2022 ALADYR WATER OLYMPICS - INTERNATIONAL EDITION. (Email rse@aladyr.net)
